HAIR CARE PRODUCTS

- DEEP REGENERATION
- INNOVATIVE REBUILDING COMPLEX
- THE EFFECT OF STRENGTHENED AND MOISTURIZED HAIR
- SAFE AND MILD FORMULAS

**KERATIN** – is a major component of hair, skin, and nails. It's a vital protein that makes up both the internal structure and the outer cuticle of your hair strands. Its loss makes hair porous, dull and coarse. Keratin products rebuild hair, make it stronger and resilient giving it vitality and radiance.

**HYDROLYZED SILK PROTEINS** – have the ability to replenish cysteine in hair which is one of the four amino acids needed to produce keratin. Additionally, as a result of hydrolysis, hydrolyzed silk proteins have a low molecular weight, so they easier penetrate hair strands. Silk Proteins make hair soft to the touch and smooth. They give it a healthy look and make it easier to comb and reduce static.
